

E-EVIDENCE RECORD

DIGITAL TEST & EVIDENCE RECORD

Electronic Evidence Record — Prototype

PART A — TEST RECORD

Test / Record ID:	CERT-TEST-001
Timestamp (UTC):	2026-09-10T12:30:00+00:00
Operator ID:	OP-001
Latitude:	22.5726
Longitude:	88.3639
Result:	POSITIVE
Confidence:	0.75
Measurement:	24.0
Quality Status:	GOOD
Decision Reason:	Measurement 24.0 compared with threshold 20.0
Model Version:	prototype-1.0
Reference Version:	reference-1.0
Image SHA-256:	aa
Record Hash:	bb
Hash Algorithm:	SHA-256
Digital Signature:	cc cc
Signature Algorithm:	Ed25519

PART B — TECHNICAL SECURITY INFORMATION

This document represents a technical electronic evidence record generated by the Digital Companion for Field Drug Testing prototype.

The test record is stored using an encrypted SQLCipher database in the prototype implementation.

The captured image can be represented by its SHA-256 cryptographic digest.

The complete canonical test record is hashed using SHA-256.

The resulting record hash is digitally signed using Ed25519.

The signed record includes security-relevant information such as the test identifier, UTC timestamp, operator ID, GPS coordinates, result, confidence, measurement, quality status, decision reason, model version, reference version and image SHA-256 value.

Integrity verification consists of recalculating the record hash and verifying the Ed25519 signature.

E-EVIDENCE RECORD — CONTINUED

PROTOTYPE NOTICE:

This document is a technical prototype generated for the Digital Companion for Field Drug Testing project.

It is not an official government, forensic or NCB certificate.

It must be reviewed against applicable legal requirements, approved procedures and the final deployment architecture before any real evidentiary use.
